About Us:

German PCC - *more than just pest control*

At least half of all animal species on planet Earth are thought to be insects. They are incredibly successful organisms, and incredibly numerous. No matter how carefully you plan, cockroaches, bed bugs and other pests can find their way into any home or business, wreaking havoc, spreading diseases, and causing untold financial damage.

For the most efficient and cost-effective way to keep your house, villa, apartment or business free of pests, German are experts in dealing with many insects, including bed bugs, cockroaches, termites, ants and termite treatment. Established in 2012 working in pest control, German can offer the very best in pest and insect control services in Abu Dhabi and across the United Arab Emirates. Catching bed bugs and other crawling critters in the earliest stages of infestation can make the difference between peace of mind and, in extreme cases, having to refurbish your entire home or business. We can suggest many methods to eradicate insects at the egg stage.

Increasingly, bed bugs, cockroaches, termites, ants, termite treatment, bird spikes, rats, spiders, fleas, ticks, wasps, bees, beetles, snakes, scorpions, pets ticks and other pests are becoming resistant to standard pesticides. We use the latest technology for pest analysis and pest control, we use natural insecticides in our bed bugs treatment and other services. Since our earliest days, we have also played a crucial role in pest control service thanks to our innovative green solution which reduces the dangers of toxicity for people. We also ensure our methods reduce and minimize any associated pollution. Our bedbug's treatments and techniques are safe for humans and pets, who have different nerve endings from insects. Our treatments also fall within the health and safety guidelines of the Ministry of Environment and Water, so you can be sure you're in good hands.

We can help you at any stage of the cycle, whether you need help establishing what kind of infestation you have, or you know what kind of pest you are dealing with. We can be with you within just 24 hours, and arrange inspections during the day, or at night, when many pests such as cockroaches and bed bugs emerge. Bed bugs can live for up to 18 months without food, although they like to feed every 8 days.

WHY CHOOSE US?

We don't only deal with insects: we can also help you if you have larger pests, such as birds or rats, on your premises. We are discreet, quick, professional and extremely competitive in our pricing. So, whether it's bed bugs, cockroaches, ants, rats, birds or other pests you need to be rid of, give us a call - we're here to help.

- ❖ Well-trained and trustworthy inspectors and technicians.
- ❖ Courteous and reliable office and sales team.
- ❖ Termatrac Termite Detector to find structure termites without any drilling.
- ❖ Internationally accepted, environment-friendly and low-risk chemicals.

Dominique Stumpf, NPMA Chief Executive Officer

The National Pest Management Association (NPMA), a non-profit organization with more than 5,500 members from around the world, was established in 1933 to support the pest management industry's commitment to the protection of public health, food and property. This commitment is reflected both in the continuing education of pest management professionals and the dissemination of timely information to homeowners and businesses.
